Dr. Michael Harden (Faxed)  
Cardiothoracic Surgeon  
Gosford Private Rooms  
98 Hills St  
NORTH GOSFORD NSW 2250

Dear Dr Harden

Norman Bogle DOB: 1/2/1953 MRN: 0540233  
U 10 231-233 Gertrude St North Gosford NSW 2250  
Ph: 0458648246, 0458648246

I reviewed Mr Bogle on the phone today. He is now four and a half years since receiving radical concurrent chemoradiation for locally advanced non-small cell carcinoma of the left upper lobe. As you know he developed a solitary brain metastasis which was treated with SRS. He remains well and asymptomatic from cancer point of view four and a half years post initial treatment.

His most recent CT scan in December shows no new developments and stable changes in his brain and lung.

I am very happy with Mr Bogle's progress and I have discharged him from my clinic as he is regularly seen by Dr Chan and Prof Back. I am more than happy to review him in the future if I could be of any service to him.

Kind regards

**Dr Roland Yeghiaian-Alvandi**  
**VMO Radiation Oncologist**

\* Final Report \*

**Allergies:** None.

**Social:** Unable to read or write except for numbers and dates so a brother (Mark) helps. Single, disability pension because of neck and pedal pains. Retired from labouring, house painting, bakery.

It was a pleasure to see Norman today at the Central Coast Cancer Centre for review of his lung cancer on surveillance follow up. He has remained reasonably well but has had a number of appointments with specialists for other health issues.

I am pleased that his progress CT scan (02 April 2025, PRP) shows no evidence of recurrence or metastatic disease from his lung cancer.

As his cancer has been stable extra-cranially I have not made a further routine follow-up appointment but he has ongoing surveillance of the brain with Michael Back. He knows to have a low threshold to return for assessment with progress imaging if there are any new symptoms or concerns that develop in the future.

Kind regards

**Dr Matthew Chan**
