Author: **Kim, Naae (JMO)**

Progress Note

Geris 2 Consult

Kumar (consultant), Van Kooten Losio (reg), Kim (RMO)

88M with dyspnoea

- HF severe pulmonary HTN, mod to severe aortic stenosis, planned for TAVI in RNSH as inpt

Thank you for consult

Consult for geriatrician review for TAVI

Progress

Patient aware of procedure and reason for procedure

Still drives

Wife at home, from retirement village, ground floor dwelling

Uses walking stick if required

Nil falls in last year
Ex-smoker, quit 30 years ago
Enjoys wine/scotch
Managing well
Independent with personal cares including showers/toileting

Discussed that sometimes clots may dislodge from heart and cause a stroke
However, with TAVI his quality of life will likely improve

O/E

Vitals BTF afebrile
MOCA 20/30

Impression

As he functions well at home, no limitations for TAVI

Suggest

Nil barrier for TAVI from geriatrics perspective
As per home team

=====
