

Royal North Shore Hospital TOE review for MitraClip-TriClip suitability. (Bases on images provided)

Janice Van De Velde DOB 01-08-1938

Normal left ventricular size and systolic function.

Dilated right ventricle with preserved systolic function

Dilated LA/RA

TAVR noted

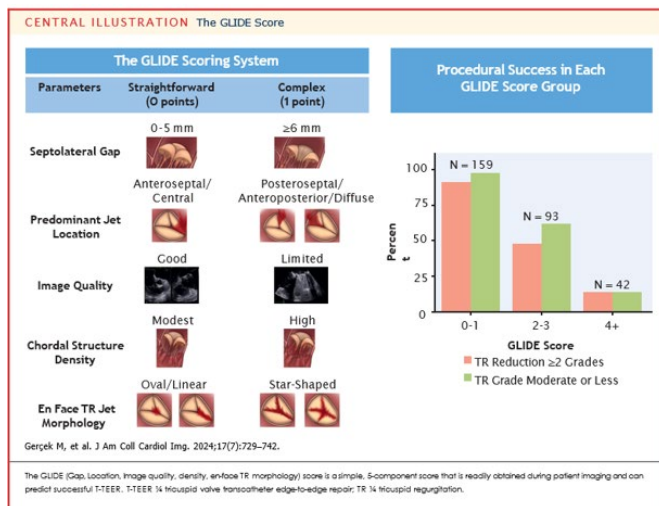

Mildly thickened mitral valve leaflets with mild MR

Tricuspid valve anatomy appears Type IIIC. Coaptation gap Septo-Anterior central 5mm, Septo-Posterior central 7mm mid 5mm

Severe to massive Tricuspid regurgitation originating central S-A, central- mid S-P

Glide score 3

Conclusion. Tricuspid valve anatomy suitable for TriClip.

Nomenclature for Anatomic Variation in TV
