Dear Peter,

Re: Mr Anthony Wadey DOB:02/02/36
45 Congewoi Rd Mosman NSW 2088

Summary of Medical Diagnoses/Problems:

1. CAD/IHD: negative stress echo 2011; nil ischaemic symptoms
2. Ex-smoker [40yrs]
3. Hypertension
4. Hyperlipidaemia
5. CVA; asymptomatic cortical infarction-left cerebellar, right frontal
6. Carotid disease – bilateral 16-49% ICA on Doppler 1/2024
7. Mild asymptomatic PAD
8. Possible PFO on echo 2023
9. Holter 9/2018: Atrial tachycardia, Broad complex tachycardia [6 beats], atrial and ventricular ectopics
10. Aortic stenosis –
 - a. Echo 12/2023 - severe based on valve area of 0.9cm²; meanPG 32, max PG 55, DOI 0.3, Vmax 38
 - b. Echo 6/2024 – severe valve area 0.8, Vmax 39, DOI 0.24, meanPG 38
 - c. Echo 12/2024 – severe AS, AVA 0.7, Vmax 39, DOI 0.23, mean PG 36, max PG 59
 - d. Echo 6/2025 – severe AS, AVA 0.6, Vmax 40, maxPG 62, DOI 0.15
 - i. Now symptomatic – dyspnoea and palpitations.
11. VTE: left DVT years ago; right calf DVT post TKR
 - a. Varicose veins: vein surgery/injection
 - b. Chronic venous hypertension with oedema
 - c. Ulceration left lower limb - chronic
12. Renal cysts on MRI 2010
13. Chronic lower back pain-no radiculopathy
14. Left TKR 2015
15. Right TKR 2016
16. Right THR 3/2017
17. Mild anaemia
18. Early onset Alzheimer's dementia

Allergies: Nil

Medications: Panadol Osteo, Aspirin 100mg daily, Perindopril 5mg daily, Metoprolol 12.5mg daily, Vesicare, Donepezil

Many thanks for seeing Anthony Wadey, 89M. He has severe symptomatic aortic stenosis and I think his only real option is TAVR. As you can see he has a lot of other co-morbidities. Could you please assess.

With Kind Regards,
Yours Sincerely,

Prof. Peter R. Vale FRACP, FCSANZ, FACC, FACP
