Dear Peter,

Problem List

APO 2021, 2022, 2023

Normal coronary arteries 2021 & 2023

Mild aortic & mitral regurgitation, severe AS. LVEF 49% 2025.

Porcelain aorta, too risky for open heart (Bassin)

CVS risks: Ex smoker; NIDDM; Hyperlipidaemia; HT.

? TIA.

CKD (chronic interstitial nephritis) on haemodialysis.

Hyperparathyroidism.

Gout

- Carvedilol 3.125mg bd, Sevelamer, Pariet, Aspirin, Vytorin 10/20mg/day, Rocaltrol, Sifrol, Progut.

Re: Consideration for TAVI at RNSH

Thanks for reviewing this 77-year-old with severe aortic stenosis. Symptoms are fairly mild although she has had APO on three occasions. She is undergoing haemodialysis. She was reviewed by Dr Bassin in the past who felt open surgery was too risky.

Kind regards,

Tony Kull
