- Total score: 29/30
- 1 point added for education level
- (Normal cognition \geq 26/30 as per MOCA guidelines)

Impression - DW Dr Liu

Mrs Janet Telfer is an 84 year old lady who has presented with symptomatic severe aortic stenosis.

She appears to be well supported from home and independent in her activities of daily living.

Her functional and cognitive assessment by the occupational therapist is reassuring.

There is not a contraindication for Janet to proceed to having a TAVI from an Aged Care perspective.
