Dear Dr Ray

Re: Colin Bromley DOB: 23/10/1936

Site 26 115 Pacific Hwy, Kangy Grove Estate KANGY ANGY NSW 2258

I caught up with Mr Bromley regarding his lower leg bypasses.

I understand that they have clarified that he does not have a metallic valve and can be on an NOAC with his aspirin. He has a palpable right popliteal pulse and his left bypass pulse. It is very tortuous, but still palpable and duplex shows that both bypasses remain widely patent. He also has a small abdominal aortic aneurysm that is well below treatment threshold of 2.6 cm.

For now, I will see him in nine months with the surveillance study.

Yours sincerely

Dr Adrian Tchen

Vascular Staff Specialist
