RE: Mr Robin Thorpe
Address: Lynwood Station, Cobar NSW 2835
DOB: 27/12/1946
Contact: 0427 772 850

Dear Dr Sandirasegaram Abraham,

Background:

1. CTCA, 2024: Mild LAD disease.
2. Echocardiogram, 2024: Moderate aortic stenosis, mild AR, and moderate LVH.
3. Stress echocardiogram, 2024: No evidence of inducible ischaemia.
4. Dyslipidaemia, on *rosuvastatin 20mg daily*.

Thank you so much for your referral to review Robin whom I caught up with for cardiovascular assessment on 20th December 2024, accompanied by his wife.

As you know, Robin is a 77-year-old gentleman with past medical history as summarised above. He presents for renewal of his licence. He was previously seen by Dr Roberto Spina at Coastal Cardiology earlier this year. At that time, he had a number of cardiac investigations which are summarised above.

Robin has been well from cardiovascular perspective. He denies any chest pain, shortness of breath, palpitations, presyncope or syncope.

Today, I organised a **stress echocardiogram** in the rooms. This was negative for any inducible ischaemia.

IMPRESSION AND SUGGESTIONS: I am very happy to renew Robin's licence today. I will catch up with him in six months to assess his valvular disease and other cardiovascular risk factors.

Thank you for your ongoing care of this pleasant patient, and please do not hesitate to contact me if you require any further information.

Yours Sincerely,

Dr Siddharth Trivedi
